2. About HSK-4

The new HSK test was launched by *Hanban* in an effort to better serve Chinese language learners. The test is the result of coordinated efforts by the experts from different disciplines including Chinese language teaching, linguistics, psychology and educational measurement. The new exam combines the advantages of the original HSK while taking into consideration the recent trends in Chinese language training by conducting surveys and making use of the latest findings in international language testing.

The HSK (Level IV) assesses test takers' abilities in the application of everyday Chinese. It is the counterpart of the Level IV of the *Chinese Language Proficiency Scales for Speakers of Other Languages* and the B2 Level of the *Common European Framework of Reference (CEF)*. Test takers who are able to pass the HSK (Level IV) can converse in Chinese on a wide range of topics and are able to communicate fluently with native Chinese speakers.

The HSK (Level IV) is intended for students who have studied Chinese 2-4 class hours per week for four semesters (two academic years). These students have mastered 1,200 commonly used words and related grammar patterns.
