2. About HSK-3

The new HSK test was launched by *Hanban* in an effort to better serve Chinese language learners. The test is the result of coordinated efforts by the experts from different disciplines including Chinese language teaching, linguistics, psychology and educational measurement. The new exam combines the advantages of the original HSK while taking into consideration the recent trends in Chinese language training by conducting surveys and making use of the latest findings in international language testing.

The HSK (Level III) assesses test takers' abilities in the application of everyday Chinese. It is the counterpart of the Level III of the *Chinese Language Proficiency Scales for Speakers of Other Languages* and the B1 Level of the *Common European Framework of Reference (CEF)*. Test takers who are able to pass the HSK (Level III) can communicate in Chinese at a basic level in their daily, academic and professional lives. They can manage most communication in Chinese when travelling in China.

The HSK (Level III) is intended for students who have studied Chinese for three semesters (one and a half academic years), with 2-3 class hours in each week. These students have mastered 600 commonly used words and related grammar patterns.
